

## Container – Testimonials

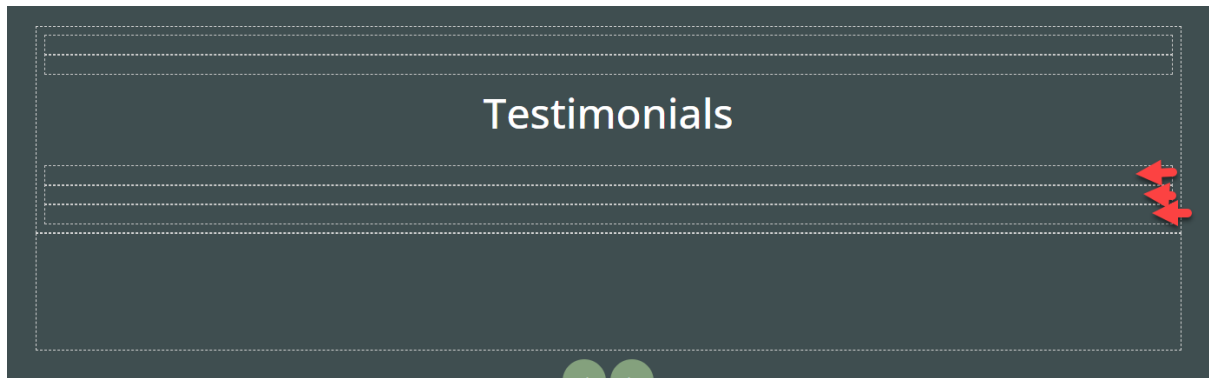

The testimonials module is not actively visible when logged in, this is by design to allow you to administer it without the movement, as we have disabled it while logged in.

Logged out

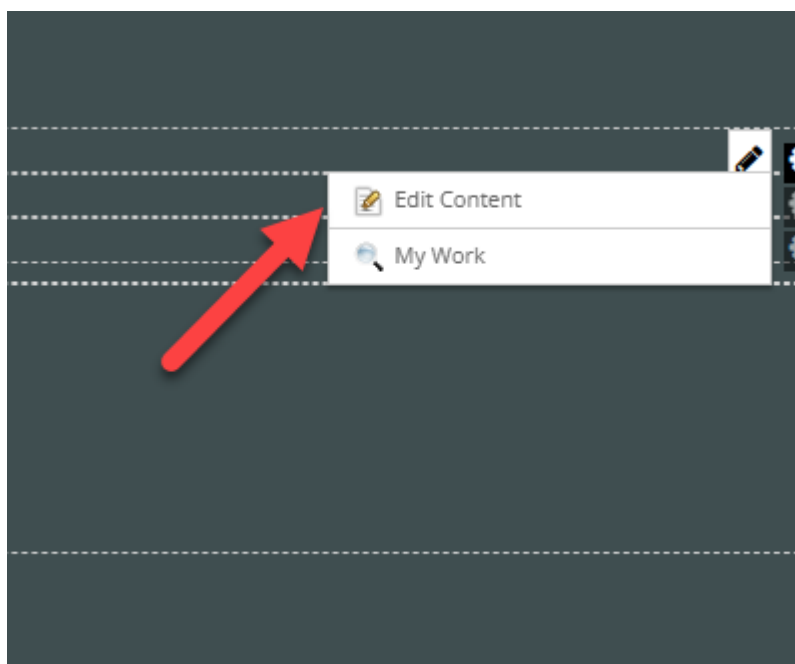

Each one of these is a separate testimonial

Each container has the testimonial container as seen below

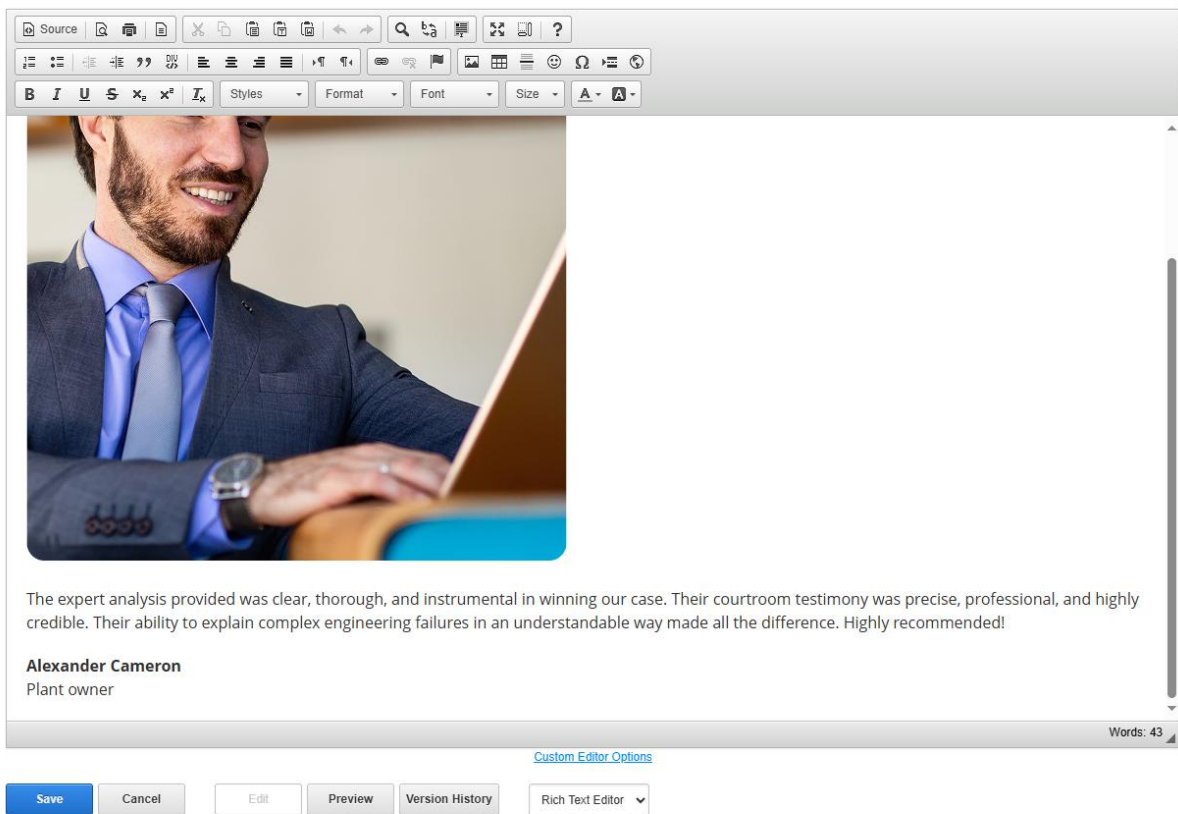

Edit content as normal

## Edit content to add your content

You will want to add an image, a paragraph and a further paragraph for the users name

Bray Demo > Home > Edit Content

The expert analysis provided was clear, thorough, and instrumental in winning our case. Their courtroom testimony was precise, professional, and highly credible. Their ability to explain complex engineering failures in an understandable way made all the difference. Highly recommended!

Then just place each testimonial underneath each other so they work together.

## Testimonials

The expert's analysis of the system's operational failure was exceptionally detailed and accurate. Their ability to replicate the failure in a controlled environment for court demonstration was decisive. Their understanding of the complex mechanical interactions was unparalleled. Their expertise saved us from a substantial financial loss. A truly exceptional engineer.

**Michael Evans**  
Manufacturing Director
