

Image Circle Section

This section consists of 5 editable areas with some Z-Index requirements due to the centre image. This guide will help you understand how to get around that.

- 1. The centre image is sized 276px by 276px and is circular. Please stick to this otherwise you will have problems with the outside rings not being positioned correctly.
- 2. Edit the image first. To do this you must drag the circle to another pane to work on then move it back, this is due to the words overlapping the box which mean you lose the ability to edit the image if you do not.

www.bbi.co.uk

Where the red arrow is pointed, with your mouse drag it out of the central box to an area higher up From here.

To here.

You will notice the styling is off, but do not worry, as soon as you move it back it will be corrected.

Make your changes and then move it back, drag where it shows back to where it was

The circles will look off in admin mode but are fine when logged out

There is no special container for this, as long as it's in the right place you can use a No Title container

The four outside modules can be edited as normal.
