Module Content

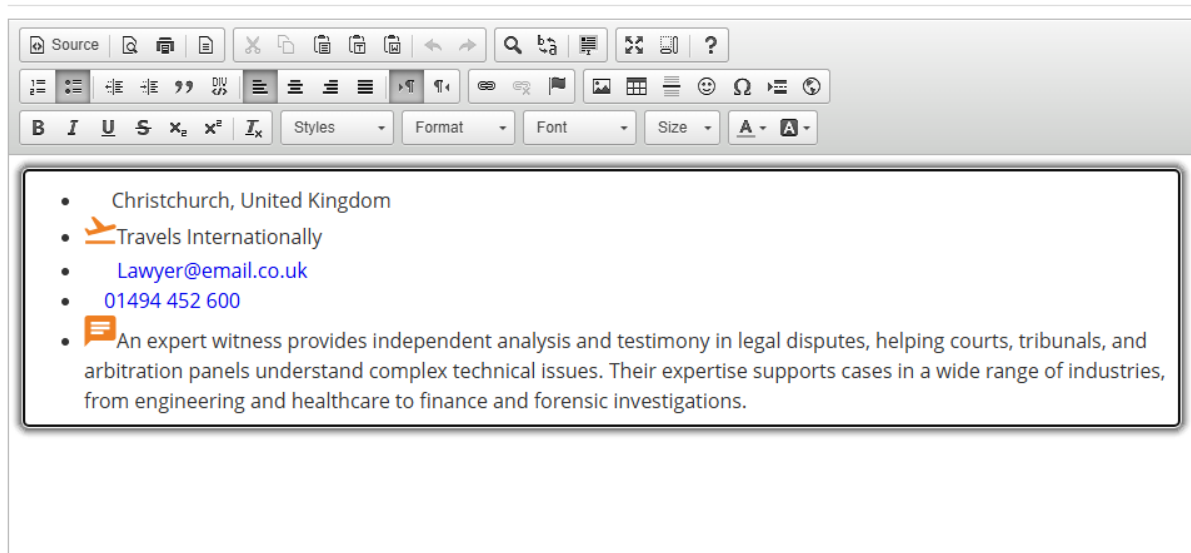

Holds the content.

Adding SVGS to the content (which is the point of this module) will change the colour and format of the svg so it is consistent. You must ensure that the svg you use has a solid colour and is simple.

In the image below you can see only 2 SVG's, this is because the rest are white, this shows that we can use different colour svgs and they will all be converted the same.

 [01494 452 600](tel:01494452600)

 An expert witness provides independent analysis and testimony in legal disputes, helping courts, tribunals, and arbitration panels understand complex technical issues. Their expertise supports cases in a wide range of industries, from engineering and healthcare to finance and forensic investigations.

The editor will get you where you need to go for the layout, you can choose the list icon to create a list.

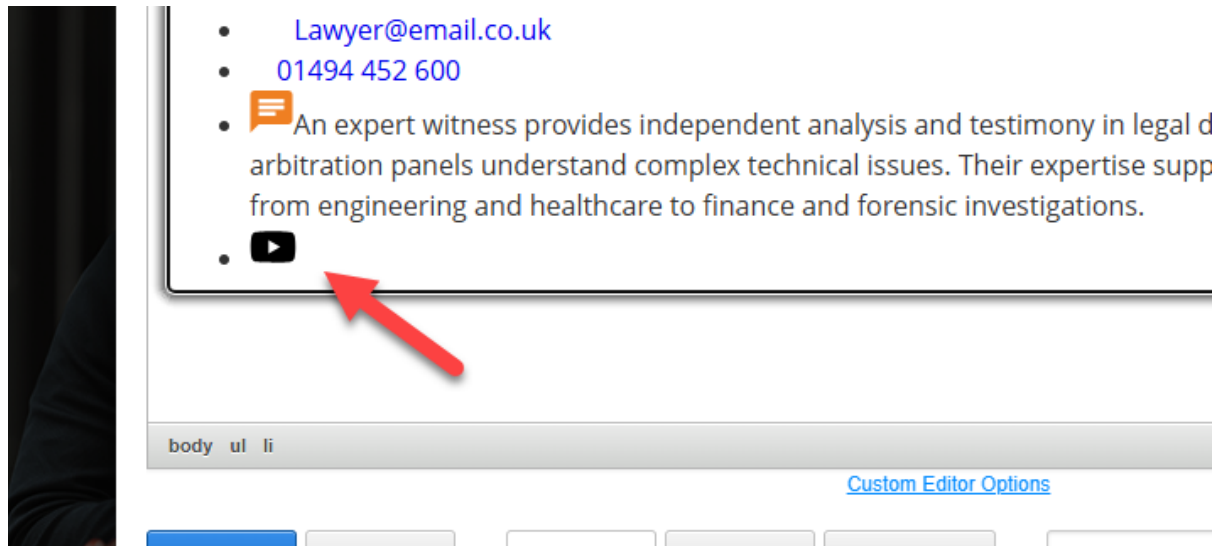

Then the image icon to add an image.

This method shows that we can add any svg and it will display correctly on the front end.

Adding an SVG

Result.

 An expert witness provides independent analysis and testimony in legal disputes, helping courts, tribunals, and arbitrators understand complex technical issues. Their expertise spans a wide range of industries, from engineering and healthcare to finance and forensic investigations.
