

# Expert Witness Services for the Engineering Sector

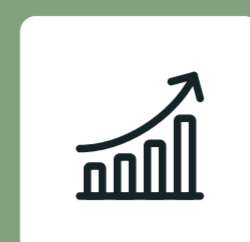

### PERSONAL INJURY

I assess engineering failures and safety breaches causing injury or harm.

### COMMERCIAL DISPUTES AND PRODUCT LIABILITY

I evaluate defects, compliance, and responsibility in engineering-related legal disputes.

### BUILDING SERVICES & ELECTRICAL SYSTEMS

I analyse faults, failures, and compliance in building engineering systems.

## Experienced engineering expert witness specialising in safety, failures, and disputes

I provide expert analysis on engineering failures, compliance, and liability, leveraging 25 years of industry experience. My expertise covers personal injury, product liability, commercial disputes, and building services, delivering forensic investigations, technical reports, and litigation support for legal professionals and insurers.

- ✓ Air Transportation
- ✓ Loss Evaluation
- ✓ Personal Injury

## Expert Witness ready to help

With extensive experience in engineering analysis, I provide expert witness services in mechanical failures, safety compliance, and forensic investigations.

### Academic Background

Holds a Master's degree in Mechanical Engineering and is a Chartered Engineer with over 25 years in the industry.

### Professional Experience

Former senior engineer in industrial plant maintenance and failure analysis, specialising in forensic investigations and litigation support.

## Testimonials

The expert analysis provided was clear, thorough, and instrumental in winning our case. Their courtroom testimony was precise, professional, and highly credible. Their ability to explain complex engineering failures in an understandable way made all the difference. Highly recommended!

Alexander Cameron

Plant owner
