Pilot

ATPL (CAA)

I can provide expert witness services across the aviation industry. I have been commissioned to prepare reports for both plaintiffs and respondents. With a wealth of expertise accumulated over more than 10 years in the civil aviation sector, my in-depth knowledge is both broad and comprehensive. I have held senior positions within the industry, and possess significant hands-on experience in regulatory adherence and operational best practices.

## Aviation Expert Witness Services

Consultation, written testimony, and court appearances

## Frequently Asked Questions

**Q** Are you available to attend court when needed?

**A** Yes. I understand the importance of expert testimony in legal proceedings and prioritise availability for court appearances, hearings, and meetings. My schedule is carefully managed to ensure I can provide in-person or remote testimony as required. If instructed, I will work with legal teams to confirm availability well in advance.

**Q** Have you testified in court before, and are you comfortable with cross-examination?

**A** Yes. I have provided expert testimony in court and tribunals, delivering clear, well-reasoned evidence that stands up to scrutiny. I am experienced in handling cross-examination and ensuring that complex aviation matters are explained in a way that is understandable to legal professionals and judges.

**Q** What experience do you have in cases similar to mine?

**A** I have worked on a broad range of aviation-related cases, including airliner accidents, aircraft maintenance disputes, lease disagreements, and air traffic control incidents. My expertise spans airline operations, business aviation, General Aviation (GA), helicopters, and engineering and maintenance. If you would like more details on relevant past cases, I would be happy to discuss my experience in relation to your specific requirements.

**Q** Can you provide independent and impartial opinions?

**A** Absolutely. As an expert witness, my role is to provide objective, evidence-based assessments that are independent of the instructing party's position. My findings and testimony are grounded in facts, industry standards, and regulatory frameworks, ensuring that they are both credible and defensible.
